

US COVID-19 Testing & Vaccination MEDIA KIT

AMI is the Leading American Company on the Frontlines of COVID-19

AMI Expeditionary Healthcare (AMI) is delivering critical time-sensitive COVID-19 medical solutions to federal, state and local governments as well as private corporations, international institutions and governments around the world.

Expeditionary healthcare is the short suspense global deployment of tailored healthcare solutions comprised of any combination of staff, facilities, consumables, pharmaceuticals, equipment and clinical governance that generates the healthcare outcome needed by the client.

A key feature of AMI's work is our ability to operate in areas where health services are under-resourced or non-existent. Our strong operational model ensures clinical and fiscal rigor while maintaining the necessary flexibility to meet changing environmental, clinical and contractual demands.

Physician-owned and physician-led, AMI has been providing healthcare solutions for over a decade in some of the most remote and challenging environments on the planet.

mission

To deliver urgent, agile and essential healthcare solutions to people across the globe.

vision

Sustainably train and deploy qualified teams of healthcare providers and medical logisticians who know exactly what is needed to save lives, stabilize communities and respond to emergent healthcare crises with a focus on quality patient care.

17
US states

25 mobile testing sites
10+ mobile vaccination clinics

AMI Has Vast Expertise, Leadership, and a Full Skillset

70 clinics/hospitals **7,000** medical personnel **5** continents **14** countries

our work

AMI Expeditionary Healthcare is the sole services private solution to support the Department of Health and Human Services (HHS) Disaster Medical Teams (DMATs) and the sole contractor for the Center for Disease Control and Prevention (CDC) for Commercial COVID-19 Emergency Response Teams (C-C19ERT.)

AMI started deploying clinicians in February to Washington and California and has deployed thousands of clinicians, administrative and logistical personnel to support federal, state and county COVID-19 responses across the U.S. We are engaged in contracts with HHS and CDC in providing clinical support to multiple ongoing efforts in Pennsylvania, Georgia, Wisconsin, Arizona and the Navajo Nation as well as 15 other states.

We take lessons learned from our Ebola crisis response in Liberia in 2014 and 2015 and apply them in the fight against COVID-19. The senior leadership at AMI has decades of medical experience providing surgical care and medical support in grueling and dynamic environments and are dedicated to cultivating a new generation of healthcare providers to both participate in and lead an expanded mission of global medical response.

clinical leadership

Dr. Andrew Walker MD, MBA is Chairman, Chief Executive Officer & Co-Founder of AMI. Over the last 20 years, he has led teams that have developed and commercialized a range of successful businesses in healthcare and other sectors. In 2016, Dr. Walker was Ernst & Young's "Australian Entrepreneur of the Year," and has been twice inducted into the EY Entrepreneur Global Hall of Fame. Prior to going into business, Dr. Walker served as an officer with the Australian Army as both an Infantry and Medical Platoon Commander in its elite parachute Battalion.

Dr. Thomas G. Crabtree, MD, FACS is the Group Medical Director. Prior to forming AMI, he retired as a Colonel from the US Army. During his military career, Dr. Crabtree served as a trauma and reconstructive surgeon in multiple domestic, overseas, and combat settings. He was also seconded to the UN on several occasions to support various Department of Peacekeeping Operations missions. Dr. Crabtree led large-scale AMI efforts running multiple USAID supported Ebola Treatment Units across Western Africa and served as a clinical director of three WHO Trauma and Maternity Hospitals in Mosul.

Dr. Jorge Simental, MD is the Clinical Director of COVID-19 Testing and Vaccination. As an Emergency Medical Doctor, Dr. Simental has extensive experience in emergency response and task force management. Dr. Jorge was lead physician in New York City at the Billie Jean King Mobile Unit during the initial COVID-19 outbreak at the beginning of 2020 and has led the COVID-19 testing and vaccination efforts for AMI in the Navajo Nation, Pennsylvania, and Wisconsin. Dr. Simental's work throughout the pandemic informs him of the scale and immediacy required for a national and global COVID-19 response.

patient privacy policy

Patient privacy is paramount. AMI asks that all media outlets respect patient privacy and comply with state and federal privacy laws including the health information privacy standards of Administrative Simplification Provisions of the Health Insurance Portability and Accountability Act (HIPAA) and the Affordable Care Act (ACA). No photographs, audio/video recordings or interviews of patients may be taken without the patient's prior written consent, or in the case of a minor written permission of a parent or legal representative. All patients must be informed in advance and sign a media release. Media coordinators first responsibility is to protect the confidentiality, health and legal rights of each patient.
